HEAVY HAULING REPORT - IRAN

By Ralf Koch

A fantastic book for all people interested in the heavy transport business & prime movers of the 70's & 80's. See the very considerable capabilities of Iran's major heavy transport operators, & the impressive transportation technology that can be seen on routes between the Persian Gulf ports and the Caspian Sea. Iran's heavy lift specialists proved highly adept at perfecting the skills required to overcome the obstacles placed in their path. Legal restrictions applying to axle loadings are often compounded by the poor structural condition of many bridges. Tractors are another problem area. Very high tariffs present a barrier to the importation of new vehicles & whilst Iran has indigenous truck industry, it cannot adequately supply the kind of tractors required. In consequence, the heavy lift industry does an excellent job of maintaining in service heavy prime movers from the 1970s and 1980s. Modular axle units are not affected by these import restrictions, so at least the load-bearing component of the heavy lift task are modern technology.

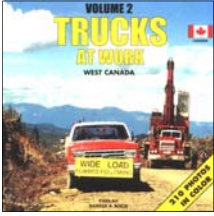

H/Back, 210 x 290mm, 160 pages, over 650 colour photos #10740 **\$99.00**

DIAMOND T TRUCKS 1911-1966 Photo Archive

By Robert Gabrick

The Diamond T Motor Car Company manufactured automobiles until 1911 when the first truck led to exclusive truck production and soon gained legendary status as style leaders. While "The Handsomest Truck in America" became a long-standing slogan, Diamond T also emphasized its engineering leadership. Builders of more than 1500 Class B "Liberty" trucks in World War I, Diamond T produced nearly 50,000 thousand prime movers, half-tracks, army wreckers, tank tractors, and tank movers in World War II. The late 1940s were years of peak production, but as the 1950s progressed, Diamond T found independent status problematic. The White Motor Company purchased Diamond T in 1958; moving production from Chicago to Reos manufacturing facilities in Lansing, Michigan, in 1960, creating the Lansing Division to produce Diamond T and Reo trucks. Both Diamond T and Reo ceased to be separate trucks starting in 1967 when Whites new Diamond Reo Division began producing Diamond Reo trucks
